20240402 LGOIMA WRC Wetland at Williamson Park

Ian finding out through WRC what was going on with Wetland – I had agreed to 'back off with LGOIMA' and Terry had promised the Master Plan if I didn't lodge a complaint to the Ombudsman so this is really the first of my restart.

Subject: REQ208325 - Williamson Pond - TCDC

Good afternoon Ian

I am expecting that a member of our Regional Council team will be in touch with you today (if he hasn't been already) with a view to discussing with you your needs around your request for information and subsequent stormwater discussions.

The request we have already partially responded to is captured as:

Request Details: Since our last correspondence TCDC set up a stormwater workshop with stakeholder engagement. I am one of the ratepayers (stakeholders) representatives at the workshops. The intent was to create a master plan of stormwater improvements to minimise and where possible mitigate surface flooding. I want to keep this request just to the Williamson Pond within the CSDC 105667 (TCDC Whangamata) for the moment. We 'the stakeholders' disagree with a recent TCDC decision to install a 'wetland' within the Williamson Park where the current pond is located. We will be taking this decision to the Ombudsman for review (for obvious reasons) if TCDC does not withdraw the decision. TCDC has stated it is in receipt of a letter from WRC (but won't provide it) claiming WRC has stated that WRC require a 'wetland' in the Williamson Park. To remove doubt this was communicated

to us in a workshop by the TCDC delegated staff official conducting these workshops as a non-negotiable requirement. My request:

1. If the WRC letter exists, please provide an unredacted copy. done

2. If the WRC letter exists, please include any background correspondence between TCDC and WRC leading up to the letter regarding a 'wetland' proposal, concept or intention or other options that could be applied to improve the current situation.

3. If there are any limitations or requirements in support of the WRC letter please provide these as well.

4. Has TCDC even discussed a 'wetland' for Williamson Park with WRC?

5. If the WRC letter exists, please provide the application and or request for 'wetland' from TCDC showing how the 'wetland' would meet the current 2020 version of the WRC Stormwater Management Guidelines pages 190-205. I have a copy of this document.

6. Has there been any subsequent amendments to this guide in relation to 'wetlands'.

If so please provide a link for me. We have a community board meeting next week (Tuesday). 021607611 221 Bellona Road Whangamata ian@moisturedetection.co.nz

If anything further comes from the conversation with staff today and is needed to be provided as part of this formal LGOIMA response, I expect it may take additional time – possibly up to 27 May 2024.

Anything available earlier will be provided as soon as it is available.

Jennie

Subject: RE: Response REQ196483- Williamson Park Lake, Ocean Road in Whangamata- Consents, operational plans

Hi Alyx

Me again. New request:

Since our last correspondence TCDC set up a stormwater workshop with stakeholder engagement. I am one of the ratepayers (stakeholders) representatives at the workshops. The intent was to create a master plan of stormwater improvements to minimise and where possible mitigate surface flooding.

I want to keep this request just to the Williamson Pond within the CSDC 105667 (TCDC Whangamata) for the moment. We 'the stakeholders' disagree with a recent TCDC decision to install a 'wetland' within the Williamson Park where the current pond is located. We will be taking this decision to the Ombudsman for review (for obvious reasons) if TCDC does not withdraw the decision.

TCDC has stated it is in receipt of a letter from WRC (but won't provide it) claiming WRC has stated that WRC require a 'wetland' in the Williamson Park. To remove doubt this was communicated to us in a workshop by the TCDC delegated staff official conducting these workshops as a non-negotiable requirement.

My request:

1. If the WRC letter exists, please provide an unredacted copy.
2. If the WRC letter exists, please include any background correspondence between TCDC and WRC leading up to the letter regarding a 'wetland' proposal, concept or intention or other options that could be applied to improve the current situation.
3. If there are any limitations or requirements in support of the WRC letter please provide these as well.
4. Has TCDC even discussed a 'wetland' for Williamson Park with WRC?
5. If the WRC letter exists, please provide the application and or request for 'wetland' from TCDC showing how the 'wetland' would meet the current 2020 version of the WRC Stormwater Management Guidelines pages 190-205. I have a copy of this document.
6. Has there been any subsequent amendments to this guide in relation to 'wetlands'. If so please provide a link for me.

We have a community board meeting next week (Tuesday) so if this could be answered by then it would be much appreciated.

I can be contacted on 021607611.

PS: Yes we will be asking TCDC formally through LGOIMA. TCDC initially volunteered the letter but have not provided it. We have recent issues with TCDC LGOIMA and hence the move to our complaint.

Subject: RE: REQ196483- Williamson Park Lake, Ocean Road in Whangamata- Consents, operational plans

Hi Alyx

Yes I think it does as all I wanted was to track down the TCDC stormwater plan for Whangamata. Now I can start assimilating it. Then if I have more need of information I can request it. I think the documentation I will need will find its way to the top as I continue my review.

I do have one question outside the request but why would TCDC want to retain the 105667 consent as an ongoing and open one other than to avoid needing to meet the RMA 2003 Amendment. That would be like me getting a 1991 building consent to build a home and getting my CCC (which is the analogy) and then me wanting to some alterations in 2023 and wishing to use the 1991 consent as the basis for the build.

Surely the reasons we have amendments etc is to improve existing old practices we have found are not meeting societal needs or standards. Things do move forward but keeping the ability to sort of 'backdate' new infrastructure to pre 2003 seems a little outside the intent of Parliament?

CAUTION: This email originated from outside of Waikato Regional Council. Do not follow guidance, click links, or open attachments unless you recognise the sender and know the content is safe.

Hi Alyx

Thank you for this information.

Additional information request. I accept this may become a new request.

Can you please send me a copy of “Kessels and Associates in 2001 form the basis of an appropriate Monitoring Programme moving forward” as referred to in page 2 of the Consent Evaluation.

Please provide me with all the drawings, specifications and monitoring program plus results issued to WRC by TCDC for the Williamson Park management of storm water collection and discharge since the consent application was made ie since 2001.

Please send me the management/maintenance of this – both the 3 yearly and annual reports.

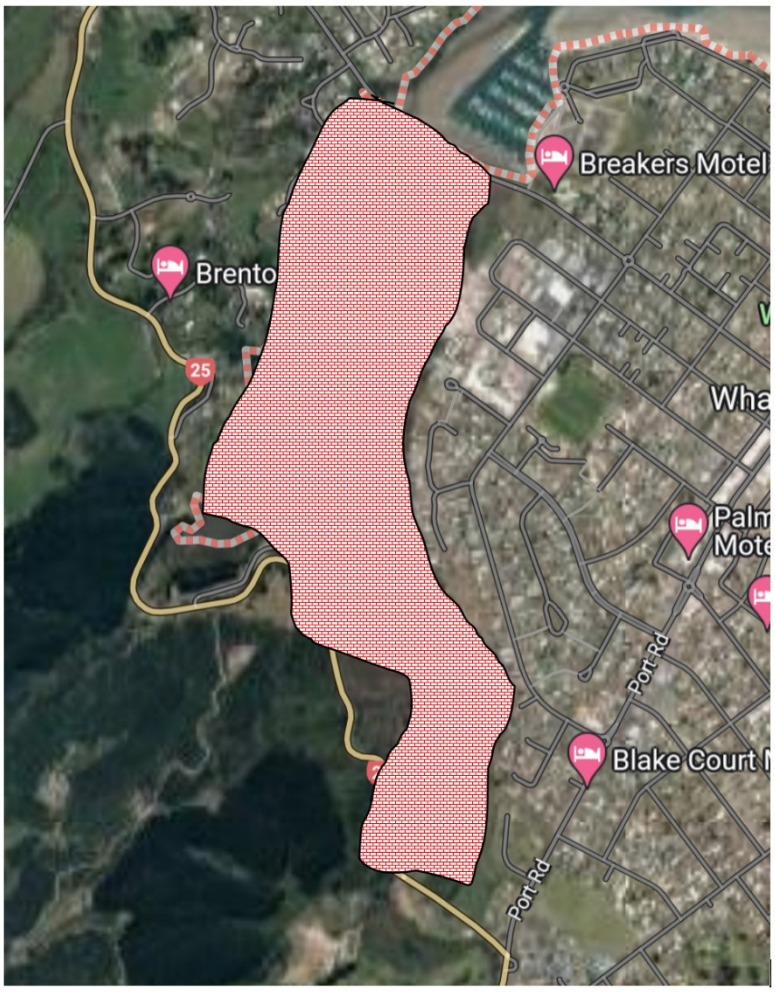
Where this information is contained within larger reporting by TCDC please provide the full report

I understand TCDC are preparing plans to dig a bypass drain around the weir to drain the sediment pond directly to the Ocean. If this is a non-notifiable consent or is intended to be embraced within the 2011 consent 105667 which precedes the changes to RMA in 2003 please register me as an objector to this amendment or new consent.

Thanks

PS: Additional request.

Within the Wentworth River between SH25 bypass Tairua bridge over the Wentworth and all the riverbed extending to high ground either side down to the Hetherington Harry Watt bridge – the Causeway as shaded below has filled with sediments. Can you please send me any reports received or commissioned by WRC covering this since the Causeway and since the Marina was constructed. If outside parties have requested a report irrespective of the originating body that requested or commissioned it please include that as I am after any sort of document or report held by WRC or within the power and control of WRC.



Could you also please direct me to ‘how to make a complaint to WRC’

Thanks

Subject: RE: REQ196483- Williamson Park Lake, Ocean Road in Whangamata- Consents, operational plans

Kia ora Ian,

Apologies for the confusion in my previous email.

TCDC is the authority responsible for managing the stormwater system in Whangamata. Waikato Regional Council is the regulatory authority – in other words WRC granted resource consent to TCDC to operate the stormwater system including any discharges to the environment. WRC also monitors TCDC's compliance with the conditions of the resource consent. How TCDC manages it SW system is up to them, WRC's role is to ensure that the system does not result in adverse effects on the environment by ensuring TCDC meets the consent conditions.

I have attached:

the decision report and certificates for TCDC's Comprehensive Stormwater Discharge Consents.

The last Annual report submitted to WRC by TCDC.

The last Compliance Inspection report prepared by WRC.

Based on the above information , can you please clarify what information you still require from WRC.

Kind Regards,

Alyx McDonald.

CAUTION: This email originated from outside of Waikato Regional Council. Do not follow guidance, click links, or open attachments unless you recognise the sender and know the content is safe.

Hi Alyx

Firstly thank you for your response.

I will take this up with an information request directly to TCDC.

I naturally assumed WRC role was to act as an independent body to ensure TA's themselves met the laws.

For a TA to 'self-issue' takes away the natural and expected gatekeeper for the RMA. These are the protections I expected to be in place just in case TA's failed to not only understand their duties but to make good past permits for infrastructure that would no longer be acceptable under the RMA if a new application was made.

I do not accept the possibility that WRC and also EW have no say in any TCDC operational plan regarding water.

If I were to lodge a complaint would I lodge it with WRC, or EW or TCDC first, and then if I'm not satisfied lodge with WRC and then if I'm still not satisfied lodge with EW and if I'm still not satisfied with the Minister? Is that the chain of events?

I would like to now request this information.

1. Does TCDC lodge resource management plans like ***resource consent held by TCDC which covers its entire Whangamata stormwater network*** with WRC
2. If not why not
3. In respect to the ***resource consent held by TCDC which covers its entire Whangamata stormwater network*** please provide all documentation, correspondence, emails and minutes of meetings WRC (and its contractors and engineers and other outside parties) have had in the lead up to the 2011 (as you stated) ***resource consent held by TCDC which covers its entire Whangamata stormwater network.***
4. In respect to subsequent events since the self-issuing by TCDC of the ***resource consent held by TCDC which covers its entire Whangamata stormwater network*** please provide me all documentation, correspondence, emails and minutes of meetings WRC (and its contractors

and engineers and other outside parties) have had following TCDC issuing the 2011 (as you stated) directive.

5. In response to question 4 above please provide me with all documentation, correspondence, emails and minutes of meetings WRC (and its contractors and engineers and other outside parties) have had in respect to any subsequent amendments to the 2011 policy (as you stated)
6. If WRC has had no communication, or input, or correspondence (including issuing or notices) to TCDC in respect to the ***resource consent held by TCDC which covers its entire Whangamata stormwater network*** please advise why not
7. In respect to question 6 above please state under what specific law or policy WRC does not need to get involved in resource consents for the use of water eg the ***resource consent held by TCDC which covers its entire Whangamata stormwater network***

Thank you

If my request is too broad, I am happy to visit you at your offices and discuss further these matters.

Ian Holyoake

Managing Director

Moisture Detection Company Ltd

Subject: FW: REQ196483- Williamson Park Lake, Ocean Road in Whangamata- Consents, operational plans

Kia ora Ian,

The Williamson Park stormwater pond and discharge are authorised by a resource consent held by TCDC which covers its entire Whangamata stormwater network. These consents were granted in 2011 and included all of TCDC's existing stormwater assets and discharges that were already established at that time.

Your questions are better directed to TCDC to respond to as the Williamson Park stormwater system is managed by that Council.

Can you please advise whether you have contacted TCDC already regarding this matter, and whether you wish for me to transfer your information request to TCDC.

Kind Regards,

Alyx McDonald

Sent: Wednesday, March 15, 2023 8:47 AM
To: 'ian@moisturedetection.co.nz' <ian@moisturedetection.co.nz>
Subject: REQ196483- Williamson Park Lake, Ocean Road in Whangamata- Consents, operational plans

Kia ora Ian,

Thank you for your information request received 14 March 2023.

What I am seeking is:

1. A copy of all WRC resource consents that cover the construction of the Lake and its discharge into the Ocean. These are to include who was approved, any conditions of use, any adverse effects and how these were to be mitigated, what maintenance requirements and performance standards were set into the resource consent for example cleaning the Lake and treating discharge other than the original natural watercourse. This would include how to mitigate Coastal erosion of the sand dunes and sand once liquified by the artificial water table around the Lake when it is not empty.

2. If no permits why not?

3. Was any discretionary powers included for example to meet Operational Plans of TCDC?

4. I understand the RMA and subsequent legislation provided for a sort of amnesty period to correct things like this. Has WRC made such application and when and provide a copy.

5. If not why not?

6. Any discharge permits issued in relation to volumes of water that can be discharged, or collected, quality of water that can be discharged, catchment areas that can be included in the redirection of land not included in the natural catchment areas and testing requirements. How was the impact of Coastal discharge satisfied?

7. If no conditions why not?

8. Any resource consents other than the TCDC Operational plan that TCDC have applied for to effect the function of detention ponds for example the Lake and discharge into the Ocean

9. A copy of the TCDC Operational Plan that WRC has approved. I have the TCDC Operational Plan but that does not reference WRC. Does TCDC need to seek WRC approval for any of the activities it requires to manage detention ponds, activities within natural stream beds and including artificial Lakes and Ocean discharges.

10. If WRC does not possess the TCDC Operational Plan can you please explain why TCDC is not required to seek such approval.

11. Would WRC agree to TCDC preparing and approving an Operational Plan (or in part) for the work I describe above to meet RMA requirements?

12. If TCDC were approved does WRC still manage the performance of that Operational Plan?

13. A copy of WRC policy, design, specification and management of detention ponds in general, like the artificial Lake at Williamson Park including changing, modifying or adapting natural water ways and in particular where they directly discharge to the Ocean or Estuary.

14. If the WRC detention pond specifications vary from the MBIE 2012 Guidelines for Artificial Lakes please provide an explanation of why they do.

15. Please provide any report available relating to Whangamata Coastline written by the WRC Coastal Engineer or manager of the Coastline (including that department). I understand WRC does not permit Coastal discharge.

16. Please provide a reference or copy of any external report covering in particular the Coastline along Whangamata Beach at the Williamson Park Lake discharge site.

In relation to timing of your response. TCDC are ready to release their Annual Plan and Long Term Plan 2023-2033 with a submission period closing 10th April 2023. They may be changing that to comply with s83(1)(b)(iii) of LGA but I must assume for now they will not change the closing date. I therefore need the information urgently. I appreciate this request is a particularly extensive one. I would accept modification of this LGOIMA if WRC intends to submit to TCDC during the submission period, or by way of special request to TCDC, WRC position and objectives and requirements that TCDC must consider and abide by in relation to Williamson Park Lake, storm water collection, containment and treatment of contaminants and discharge to the sea at the Coastline. I would require an early copy of that to allow any modification of this request so I can then evaluate WRC position so I can modify my submission to TCDC.

Council will respond as soon as possible, but in any case no later than 13 April 2023. At that time, you will be informed whether or not your request has been granted and, if granted, when Council expects to be able to provide you with the information.

If you have any further questions, please feel free to contact me.

Kind Regards,

Alyx McDonald
