Subject: RE: Your request REQ234066 - Port Road and Hetherington Road Stormwater and now reconciliation of outstanding matters
Attachments: 20261102 WRC_LGOIA_Reconciliation_Parts_A_and_B.docx

Hi Jennie

Thank you for your assistance in locating and supplying the historical Whangamatā information, including the documents made available through SharePoint.

I decided to do a reconciliation – trust this does not overload you. Its just things have got delayed and I appreciate that some of these records are historical, that archived material has required additional searches, and that your team has been managing a considerable workload.

Again would it be useful for me to visit and assist somehow?

I have now completed a reconciliation of the requests, WRC's responses and the documents I have received. The attached schedule distinguishes between:

Part A — Outstanding document delivery: information requested but not yet received, including records WRC has already identified or agreed to provide.

Part B — Completeness clarification: information partly supplied, where we need to establish whether additional reports, monitoring results or decision records are held.

This reconciliation also identifies documents I already possessed or have since received, so that WRC does not spend time supplying unnecessary duplicates.

My principal concern is the length of time these matters have remained unresolved.

In particular:

- **REQ231233 — Whangamatā Marina expert evidence:** Lodged 8 May 2026. WRC subsequently identified six potentially relevant archived hearing files in September, but I have not received the historical expert evidence.
- **REQ234066 — Port Road and Hetherington Road:** Lodged 31 August 2026. WRC confirmed on 28 September that the request had been granted and the documents were being collated. No documents have been received.
- **REQ227682 and the March 2026 follow-up:** The original request was lodged on 20 January 2026, followed by my document-by-document reconciliation in March. Although substantial SharePoint material has since been supplied, some matters remain unresolved, particularly the Marina post-consent monitoring reports.

Regarding the Marina monitoring reports, my March reconciliation specifically requested the reports submitted under the Marina consent conditions. I have included that original reference in the

attached schedule, as it may help resolve the uncertainty expressed in your 22 July correspondence about whether these reports had previously been requested.

I also ask that WRC confirm the outcome of my earlier water-quality and sediment-deposition request, **REF250219657, lodged 11 February 2025**, for which I have not located a substantive response in my records.

Jennie, I recognise that these matters involve several teams and historical records. However, some of the requests date back many months, and we are now in November. I believe it is reasonable that they receive priority rather than continue to sit behind newer work.

Could you please arrange for the outstanding material to be progressed and provide:

1. A delivery date for the six Marina archive files already identified, together with an update on the remaining expert-evidence search.
2. A delivery date for the Port Road and Hetherington Road documents already approved for release.
3. A response against each item in Parts A and B, indicating whether the information has been supplied, is held and awaiting release, remains under search, or is not held.
4. A timetable for completing the outstanding requests.

Where documents can be released now, I would appreciate receiving them progressively rather than waiting for every search to be completed.

I remain happy to meet with the relevant technical staff if that would help clarify the scope and avoid unnecessary work.

My objective is to establish a complete and reliable understanding of the technical evidence concerning the Whangamatā catchments, rivers, Moana Anu Anu, harbour and coastal environment, including what was predicted historically and what subsequent monitoring has established.

I hope the attached reconciliation will make it easier for us both to bring these requests to a conclusion.

Regards

Ian Holyoake

Kia ora Ian

I’m writing to provide an update on the progress of your request.

I have recently been advised that the team undertaking this work is managing a particularly high volume of requests, alongside staff absences. This has affected the timeframe for completing the work currently underway.

Your request remains in progress, as does your separate request relating to the review of the historical Whangamata Marina hearings file. I will continue to monitor both matters and provide a further update as progress is made.

Subject: Your request REQ234066 - Port Road and Hetherington Road Stormwater

Kia ora Ian,

I am writing to confirm that Council has decided to grant your request regarding the Port Road, Whangamatā stormwater questions.

Staff are now completing the work required to collate the information for the response. Once this process is complete, the response will undergo the necessary review and approval process before being released.

We will provide the response to you as soon as possible.

Thank you for your patience while this work is being completed.

Ngā mihi,

Jennie Cox
