20250211 LGOIMA WRC Water quality and deposition testing

I don't know if this got a response – to WRC anyway

I am a submitter to the upcoming CMP.

I live in Whangamata.

This is a request dealing with the 'water quality' of our Whangamata Harbour, Moanu Anu and Otahu estuaries.

1. Harbour: Has any water quality testing that has been completed within the last 10 years. If so could I please have a copy of the test reports and outcomes of those tests. I am particularly interested in testing required under the discharge consent for the Whangamata Sewage Treatment and Irrigation system that could 'leach' into our water ways. If WRC is not responsible for this testing please provide a copy of the instrument requiring 3rd parties to undertake this testing.

2. Moanu Anu: Please provide water quality testing that has been completed within the last 10 years. If so could I please have a copy of the test reports and outcomes of those tests. I am particularly interested in testing required under the discharge consent for the Whangamata Sewage Treatment and Irrigation system that could 'leach' into our water ways. If WRC is not responsible for this testing please provide a copy of the instrument requiring 3rd parties to undertake this testing. I am also interested in any testing done or test requirements for the Wentworth River as it enters Moanu Anu. This water quality testing period I am interested in is the last 10 years. Please include depositions for the last 30 years.

Otahu Estuary: Please provide water quality testing for the Otahu Estuary for the last 10 years and including depositions measurements for the last 30 years.

Thank you
